Where to Access Design Software on Campus

Updated August 2018

SFU

SFU students have access to several graphic design programs in many school computer labs. The full list of software that is available at SFU can be found [here](#) and a list of the open computer labs can be found [here](#). For any questions or access to specific labs not listed here, please contact [SFU IT Services](#), your department, or your course instructor.

Lynda.com has lots of tutorials if you're new to any of these programs. SFU students have [access to this resource](#) for free.

UBC

UBC students have access to several graphic design programs in many school computer labs. Graphic design programs such as Adobe Suite are available in the Chapman Learning Commons. A full list of software programs and their locations in labs on campus can be found [here](#). For any questions or access to specific labs not listed here, please contact [UBC IT Services](#), your department, or your course instructor.

Lynda.com has lots of tutorials if you're new to any of these programs. UBC students have [access to this resource](#) for free.

BCIT

BCIT students have access to Adobe and other specialised software, but only in a select few labs. These are found in building SE6. Please contact [IT Services](#) or your course instructor for questions on how to access these labs if needed.

Langara

Langara students have access to several graphic design programs in many school computer labs. The full list of software available can be found [here](#) and a list of the open computer labs can be found [here](#).

Look for computer labs that are Mac Enhanced classrooms in each building, such as A110, which has the Creative Arts Lab. These computers have access to the Adobe Suite. For any

questions or access to specific labs not listed here, please contact [Langara IT Services](#), your department, or your course instructor.

Emily Carr

Emily Carr students have access to several graphic design programs in many school computer labs. The full list of computer labs and the software available can be found [here](#). Emily Carr students also have access to Adobe Creative Cloud one year subscription at a discounted price. More information available [here](#). For any questions or access to specific labs, please contact ECUAD IT Services, your department, or your course instructor.

Lynda.com has lots of tutorials if you're new to any of these programs. Emily Carr students have [access to this resource](#) for free.
